IN THE CLAIMS

23

Amend the claims as indicated below.

1 Claims 1-58 Previously canceled.

1	59. (Currently amended) A method comprising:
2	a processor-based financial management system receiving identification
3	information for a plurality of financial accounts from a user, wherein the identification
4	information is entered by the user in a client computer an account holder, wherein the
5	information is entered by the account holder in an account holder device and
6	transmitted to the financial management system via a communications network
7	according to standard protocols accessible to any user of the network;
8	the financial management system identifying a first account balance associated
9	with a first account of the plurality of financial accounts, wherein the first account is
10	associated with a first financial-institution, and wherein the financial management
11	system is coupled via a network to the first financial institution;
12	the financial management system further identifying a second account balance
13	associated with a second account of the plurality of financial accounts, wherein the
14	second account is associated with a second financial institution, the second financial
15	institution being independent of the first financial institution, and wherein the financial
16	management system is coupled to the second financial institution via the network;
17	obtaining account information from the first and second accounts using access
18	information provided by an account holder, comprising accessing each of the first and
19	second financial institutions separately via the network;
20	the financial management system comparing the first account balance to a
21	particular value;
22	if the first account balance exceeds the particular value, the financial

management system recommending a transfer of funds from the first account to the

24	second account associated with the second financial institution, wherein the first
25	account and the second account have a common account holder, and wherein the
26	recommendation to transfer funds identifies an amount to be transferred equal to the
27	value by which the first account balance exceeds the particular value; and
28	if the first account balance is below the particular value, the financial

if the first account balance is below the particular value, the financial
management system recommending a transfer of funds from the second account to the
first account.

- 1 60. (Previously presented) A method as recited in claim 59 wherein 2 obtaining account information and comparing the first account balance to a particular 3 value is performed automatically at periodic intervals.
- 1 61. (Previously presented) A method as recited in claim 59 wherein 2 comparing the first account balance to a particular value includes applying at least one 3 rule associated with the first account.
- 1 62. (Previously presented) A method as recited in claim 59 wherein the 2 first account is a checking account and the second account is a savings account.
- 1 63. (Previously presented) A method as recited in claim 59 wherein the second account pays a higher interest rate than the first account.
- 1 64. (Currently amended) A method as recited in claim 59 further
 2 comprising if the first account balance is below the particular value, the financial
 3 management system recommending a transfer of funds from the second account to the
 4 first account in an amount equal to the value by which the first account balance is
 5 below the particular value, wherein recommending comprises displaying information
 6 on the client computeraccount holder device.

- 1 65. (Currently amended) A method as recited in claim 59 further
- 2 comprising offering to the account holder to perform the recommended transfer of
- 3 funds from the first account to the second account, wherein offering comprises
- 4 displaying information on the <u>client computeraccount holder device</u>.
- 1 66. (Previously presented) A method as recited in claim 65 further
- 2 comprising executing the transfer of funds from the first account to the second account
- 3 if the account holder accepts the offer to perform the recommended transfer of funds.
- 1 67. (Previously presented) A method as recited in claim 59 wherein
- 2 recommending a transfer of funds from the first account to the second account includes
- 3 automatically transferring funds from the first account to the second account.
- 1 Claims 68-77 Previously canceled.
- 1 78. (Previously presented) A method as recited in claim 59 wherein the
- 2 first account is a checking account and the second account is an investment account.
- 1 79. (Previously presented) A method as recited in claim 59 wherein the
- 2 second account offers a better return than the first account.
- 1 80. (Previously presented) A method as recited in claim 59 wherein the
- 2 particular value is a minimum balance associated with the first account.
- 1 81. (Previously presented) A method as recited in claim 59 wherein the
- 2 particular value is a minimum required balance based on historical data.

82.

1

2	comprising permitting the account holder to change the amount to be transferred from
3	the first account to the second account.
1	83. (Currently amended) A computer-readable medium having stored
2	thereon a computer program that is executable by a processor to perform a financial
3	management method comprising:
4	a processor-based financial management system receiving identification
5	information for a plurality of financial accounts from a user, wherein the identification
6	information is entered by the user in a client computer an account holder, wherein the
7	information is entered by the account holder in an account holder device and
8	transmitted to the financial management system via a communications network
9	according to standard protocols accessible to any user of the network;
10	the financial management system identifying a first account balance associated
11	with a first account of the plurality of financial accounts, wherein the first account is
12	associated with a first financial-institution, and wherein the financial management
13	system is coupled via a network to the first financial institution;
14	the financial management system further identifying a second account balance
15	associated with a second account of the plurality of financial accounts, wherein the
16	second account is associated with a second financial institution, the second financial
17	institution being independent of the first financial institution, and wherein the financial
18	management system is coupled to the second financial institution via the network;
19	obtaining account information from the first and second accounts using access
20	information provided by an account holder, comprising accessing each of the first and
21	second financial institutions separately via the network;
22	the financial management system comparing the first account balance to a
23	particular value;
24	if the first account balance exceeds the particular value, the financial
25	management system recommending a transfer of funds from the first account to the

(Previously presented) A method as recited in claim 59 further

second account associated with the second financial institution, wherein the first
account and the second account have a common account holder, and wherein the
recommendation to transfer funds identifies an amount to be transferred equal to the
value by which the first account balance exceeds the particular value; and
if the first account balance is below the particular value, the financial
management system recommending a transfer of funds from the second account to the
first account.
